

# THE TOOL FOR OPTIMISING THE IMPLEMENTATION OF YOUR SOLAR PRODUCTIONS

**MEO-GreenEnergy** : a decision-making tool that allows to observe, evaluate and act on the production of solar energy, by producing an inventory of the installations on a territory, then identify, optimise and increase the local potential and leading to a positive energy territory.

## THE SERVICE

### OBSERVE

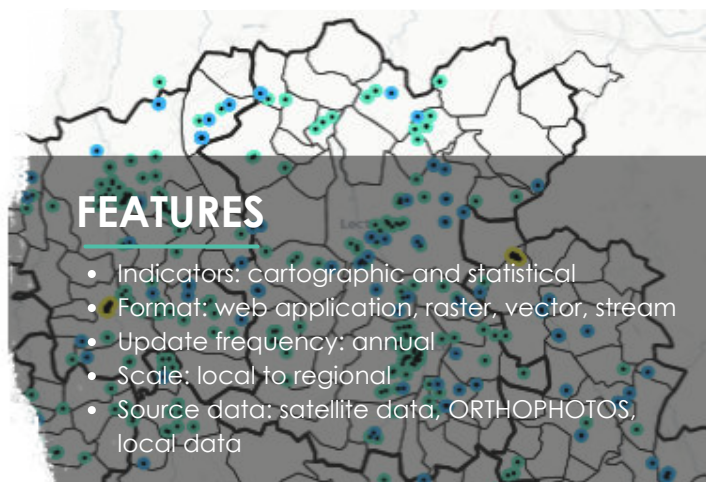

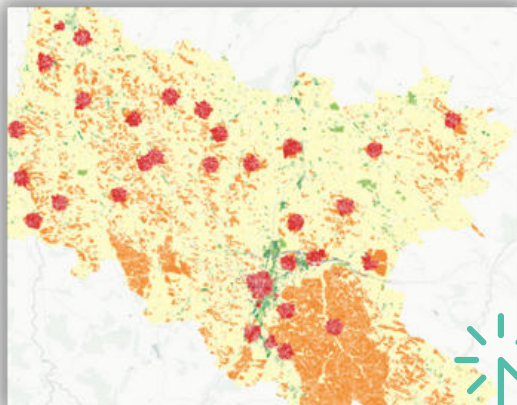

- Detect and map solar installations on the territory

### EVALUATE

- Assess the existing EnR potential
- Identify and map potential areas for new installations

### ANTICIPATE

- Plan and optimise sectors according to objectives and evaluation criteria

## WHO IS IT FOR ?

- Energy associations
- Local authorities
- Land managers and developers
- Private operators
